RELEVANT EXPERIENCE

Hybrid Apparel

Senior Financial Analyst | FP&A AI Automation Lead

April 2025-Present

- Lead enterprise budgeting, forecasting, and consolidated P&L reporting across multiple business units and portfolio entities; oversee balance sheet and bank reporting while managing the P&L analyst and driving KPI modernization through AI enabled automation and enhanced governance frameworks.
- Spearhead the company's AI implementation strategy, deploying custom GPTs with API connectors to automate contract data extraction (royalty rates, terms, licensor termination values), saving 100–200 hours annually; built a GPT-powered vendor data cleansing workflow enabling clean spend analysis, cost savings identification, and trend reporting across finance.
- Automated daily executive sales reporting via Power Automate and PowerShell, eliminating 30–60 minutes of manual work per day; deployed Claude for Excel for data validation and cleanup saving 3–5 hours per week with a full finance team rollout underway; currently developing HTML/JavaScript executive dashboards to replace legacy Excel reporting.

Financial Analyst II

April 2024-April 2025

- Owned end-to-end financial planning and forecasting across three portfolio companies, building detailed models and sensitivity analyses to support M&A evaluations, capital allocation decisions, and cash flow management.

Chedraui USA

Financial Analyst

September 2023-April 2024

- Designed and maintained financial models for complex, multi-variable projects, delivering accurate forecasts that enabled faster, more confident decision-making across the organization.
- Synthesized financial data across disparate sources to surface trends, anomalies, and growth opportunities, informing leadership decisions on pricing strategy, product development, and marketing investment.

Senior Sales Analyst & Pricing Manager

December 2017-September 2023

- Engineered a dynamic market price-comparison program that reduced pricing discrepancies in collected data, improving the company's overall pricing strategy and expanding margins by 2%.
- Forecasted weekly, monthly, and annual sales across seven purchasing departments representing over 40% of total company revenue, identifying category-level opportunities to drive sales improvement and optimize product turnover.

Herbalife International

Data Analyst

September 2017-December 2017

- Leveraged Oracle-based BI platforms to manage large datasets and generate interactive reports for the receipting department, measuring pilot program productivity and contributing to increased net U.S. sales.

JPMorgan Chase & Co.

Relationship Banker

September 2016-September 2017

- Managed a portfolio of retail and small business client relationships, providing financial solutions across banking and investments while holding Series 63, Series 67, and insurance licenses and serving as Manager on Duty for branch operations.

Milwaukee Tool

Sales Territory Manager (\$10M market)

June 2011-June 2015

- Delivered 43% revenue growth, 39% profit growth, and 40% market share expansion by rapidly building strategic relationships and executing national and local go-to-market initiatives backed by rigorous financial analysis.
